Learn How One Client Got a Whopping 32% Conversion on the First Use of the Automated Webinar Replay Service StealthSeminar

In launching a brand new product internally to my list...I was nervous about using a system I've never tried before. I decided to give stealth seminar a try because of the reviews and features.

Before it even started I loved how easy the system was to use and set up for a non-techie like myself.

The internal launch was very small (I picked a bad time) as only 128 people from my list made it all the way to the Call To Action.

I thought if I would have gotten 5 sales off that it would be OK and 10 sales would have been great. 15 or 20 and I would have considered myself a rockstar. Within 5 minutes of the call to action I had 32 sales of a \$97 product and after 30 minutes a total of 42 sales rolled in before I shut it off completely.

I know that 128 views is not enough to make a highly statistically significant testimonial but I think **the conversion % was so astronomically high $42/128 = 32\%$** . That even if it's 3x higher than normal, I'm still thrilled. This put wind in my sails to launch this on a much bigger scale...and the internal launch just started this week.

The ease of the system to set up and maintain...combined with the super stealth ninja jedi tactics that Geoff and Greg created has made my jaw drop and realize where most of my sales efforts are going and what technology will take me there.

Thanks again.

Brad Costanzo
